

AHMAD ABUDAWABA

FULL STACK DEVELOPER | 00962777856741 | Remote | ahmedqss120@gmail.com | [Portfolio](#) | [Linkedin](#)

Professional Summary

A self-taught Full-Stack Developer with over six years of experience in developing web applications using JavaScript, PHP, Laravel, Vue, React, Node.js, and MySQL. My passion lies in creating user-friendly and efficient web solutions.

Experience

Tripsome

Travel booking platform
Azerbaijan, Baku. Remote

Frontend Engineer • April 2025 – April 2026

- As a Frontend Engineer at Tripsome, I built features from scratch and translated Figma UI components into production-ready web components, following best practices.

Metapic

Marketing agency
Stockholm, Sweden. Remote

Full Stack Engineer • Mar 2023 – Jun 2024

- Successfully integrated various third-party APIs, including Google Analytics, Awin, Mailchimp, and CJ, as well as payment gateways like Stripe.
- Developed a new dashboard from scratch for stores to manage and analyze affiliates, sales, issue payment bills, and manage user permissions.

Logistaas

A freight forwarding software,
Jordan, Amman. Remote

Front-end Developer • Feb 2022 – Mar 2023

- Developed and maintained interactive user interfaces using React and Vue.js, ensuring responsive design and seamless user experiences.
- Implemented features based on client requirements, integrated APIs, and optimized performance for various web applications.

Tripsome

Travel booking platform
Azerbaijan, Baku. Remote

Full Stack Engineer • Oct 2020 – Nov 2021

- Developed and maintained various applications, including building new features and refactoring existing code.
- Created an analytics dashboard to display critical company data, track sales, gross profits, net profit, and manage admin and user permissions.
- Designed and implemented a dashboard for organizations to manage their events.

VAV Technology

Professional website
development services
North Macedonia, Skopje
Remote

Full Stack Engineer • May 2019 – Dec 2020

- Developed and deployed a wide range of static websites and custom CMS solutions for clients using modern technologies such as JavaScript, React, TypeScript, and Node.js. Designed and implemented automation scripts to streamline repetitive tasks, significantly improving development workflows, productivity, and overall system efficiency.
